

# VICTORIAN DESALINATION PROJECT

## FACT SHEET

**WATER NOW  
AND FOR THE FUTURE.  
FOR SURE.**

### WORKFORCE ACCOMMODATION

Construction of the Victorian Desalination Project will require a workforce of approximately 1700 people. While many positions will be filled locally, there is also a need to source local rental accommodation for workers during the two year construction period.

The Victorian Desalination Project Housing Accord has been developed by Bass Coast Shire Council, local real estate agents and AquaSure's design and construction contractor, Thiess Degrémont.

It recognises the importance of maintaining the existing pool of long-term rental properties for local residents and ensuring that hotel accommodation remains available to drive the local tourism economy.

The Housing Accord provides Thiess Degrémont staff with an entirely new and exclusive accommodation option – holiday homes that have never been rented before.

Bass Coast Shire Council has sourced more than 600 of these homes throughout the region, ranging in price and size.

These properties are available to personnel working on the desalination project and can be found on the Bass Coast Shire Council website.

This website lists rental accommodation that meets the requirements of the Housing Accord and is the only housing website that Thiess Degrémont will be promoting to its employees, subcontractors and suppliers.

**I have a holiday house that I want to rent out. Who should I contact?**

We are only interested in promoting holiday homes and investment properties that have not previously been available to rent on an ongoing basis.

If your property meets this criteria, we recommend you contact a real estate agent that is a signatory to the Housing Accord and ask to have your property listed on the official desalination accommodation website.

Contacts for Housing Accord agents are listed over the page.
